

GreenCoast Helpful Dosages and Amounts

an ever changing list

Azatrol- In a quart mix 3 tsp of azatrol and a few drops of wetting agent with distilled/RO water. Shake and apply. Wait 5 days and reapply by increasing dose to 4.5 tsp of azatrol with wetting agent and water. If spraying indoors we recommend raising the lights or spraying while the lights are off. Outdoors spray either early in the morning or at dusk. For best results use within 24 hours.

Big Bud - use during weeks 2-5 of bloom. Use 2tsp./ Gallon.

Bonide Systemic- 1 oz per 10 gallon. See *Fungus Gnat or Root Aphid info Sheet for more info.*

Budswell – 1-2 tbsp per gallon (more specifically to help with fruit development):
weeks 2-5 of bloom 1 tbsp per gallon
weeks 6-8 of bloom 2 tbsp per gallon

Cannazym - Use 8-20mL/Gal. We find Regular Strength to be 10mL/Gal. Bump up to Higher Strength (15-20mL) for final 2 weeks of Bloom or when Flushing out Coco before reusing.

Carboload – 1 gm/Gallon. Use from start of Bloom to finish, increase the dose over time.

Dutch Master Silica- 1 tsp per 2.5 gallons.

Don't Bug Me - RTU - Well not really. We prefer to pour out 1/2 set it aside for later. . .& mix in purified water to top. Then spray with 50% Don't Bug Me & 50% Purified Water solution. In this way you will get 2 bottles worth.

Einstein Oil - Look to Info Sheet on Neem Oil. Mix 1/2tsp. per Quart of warm purified water. Mix in Coco-Wet or other wetting agent. Spray. Now wait 3 days - Spray again. Wait 3 days. . .Now Mix 1 tsp. per Quart of Warm water with Coco - Wet and Spray (top sides and lower sides of leaves!). . .Now wait 3 days and Spray again with same dosage. Now wait 3 days and Mix at 1.5 tsp. per Quart of Warm water and Coco-Wet. Spray again. Wait 3 days and Spray with same dosage. Now wait 3 days and mix at full dosage of 2tsp. per Quart of warm water and Coco-Wet. Spray! Wait 3 days and Spray again. Lastly. . .Continue to Spray every 3 days until the 3 week of Bloom at the same dosage of 2tsp. / Quart of warm water - making sure to mix in Coco-Wet.

Final Bloom - 5ml per gallon. Use weeks 6-7 of Bloom. Some People like to use during Week 8 as well.

Floramite- ¼ to ½ tsp of floramite per gallon of distilled/RO water, add enough indicate solution to homogenously blend the water and turn it pink, Once water is pink stop with the indicate solution. If spraying indoors we recommend raising the lights or spraying while the lights are off. Outdoors spray either early in the morning or at dusk. For best results use within 24 hours. Spray the tops of the leaves, this product will penetrate to the underside. Wear protective clothing, goggles, chemical resistant gloves and a pesticide respirator.

Forbid – 1/8 to ¼ tsp per gal. Of distilled/RO water. If spraying indoors we recommend raising the lights or spraying while the lights are off. Outdoors spray either early in the morning or at dusk. Spray the tops of the leaves, this product will penetrate to the underside. Wear protective clothing, goggles, chemical resistant gloves and a pesticide respirator.

Gnatrol - ¼ tsp. to 3 ¼ tsp. per Gallon. In Powder Form.

Grand Finale - 4-6tsp. per gallon. Use the last 2-3 weeks.

GreenLite Spinosad Product - Use 1-3 tsp./Quart. Start with 1 tsp. / Gal. Wait 3 days - hit them with 2tsp./Gal.

GreenLight Systemic Killer - Use 1-3 tsp./Quart. Use every other week for treating Root Aphids or Fungus Gnat Larvae.

HB-101 – 1 ml per liter, twice a week for optimum results. Use as soon as possible after diluting. Mix fresh every time, do not use a wetting agent or combine with any other additives or nutrients.

MagiCal - 75-200ppms. Depending on what stage you are in. more is needed in Ve. and Early (wks 1-4) of Bloom.

Mother Earth Bloom Tea – do not follow what the label says, start using it in the 2nd week of bloom. Use 2-4 ml per gallon. Weeks 2 – flush (2ml), Final weeks double the dose to 4 ml.

Organa Guano - Mix 2 tsp./Gal. Use for weeks 6-7 of a 8 week strain. Do not use w/ OverDrive unless cut dosages in 1/2.

Overdrive -use during weeks 6-7 or /6,7,8 of bloom. 2tsp. per Gallon. *Do NOT use with BigBud.*

Ooze Bloom - 2tsp./Gal. Wks 4-6 of Bloom

Pestout- begin w 1.0 tsp to 1 gal of Purified Water. Increase the dosage as nec. Spray both sides of leaves.

Phosphoload – 2-6 ml per gallon apply at day 16 of bloom, apply to a clean reservoir – add water, phosphoload, something to protect roots, nutrient at ¾ strength, run this for 3 days, flush, and then re-up as normal

Phat Bloom - 1-4tsp. Gallon. (Wk 2 of Bloom - 4tsp./Gal., Wk 3 of Bloom - 2tsp./Gal., Wk 4 -1tsp./Gal., Wk 5 - 1tsp./Gal.

Purple Maxx- Spray 5 ml per quart starting week 3 of a plant's bloom cycle. All the way until finished once or twice a week (after week 4 of the plant's bloom cycle you should spray a light dusting onto the fan leaves instead of the fruit, because the fruit may mold.) In the final two weeks, 1 tsp per gallon in the reservoir (soil/ or hydro).

Pure Flowers – 1 tsp for every 7 gallons

Rhinoskin - Use 1-2 tsp./Gal.

Roots Bloom - 1/2tsp./Gal. all the way through Veg. and Bloom.

SeaFuel - 1-2tsp./Gal. Can use as a Foliar Spray as well at ½ -1 tsp./Gal. for more oil/resin / sugar production.

Seaweed (yellow Bottle Line) - 1-2tsp./Gal. Can go as high as 4tsp./Gal. Just build slow and watch for burning!

Silica by Ag. Organics - Just use it as your pH up. Adjust as needed.

Bud Candy - 1-4 tsp. / Gal. Start at 1 tsp./Gal. in Veg. and Early Bloom. After week 2 of Bloom start to ramp it up.

Subculture – Follow label on this one. Either “M” or “B”. it cannot or will not burn plants at all!

Top Max – 1 tsp. Per gallon 1st week of bloom, as long as the plants are healthy keep increasing the amount of tsps each week until you reach 4 tsp in the final week of bloom.

Ultra Bloom - 1tsp./Gal. for Weeks 1-2 of Bloom (and going into Bloom - 1st day should have 36 hrs. of Darkness.)

Vermicrop Organics – 1.5 cup per 5 gallon. In Coco / Soil - 1 Gallon per 50 Gallons of Solution. In Hydroton / Rockwool - 1 Gallon per 25 Gallons.

Zero Tolerance - Dilute Ready to use to 1/3 solution with Purified Water. Ask us for help if needed.

Zone- 1 tsp. / 2.5 Gal. --- Extra Strength 1 TableSpoons (3 times norm. dosage) per 2.5 Gallons
