Stainless Steel Rings, Squares, and Pattern Bar Sizes

NEW FORM!!

12" Triangle 2" DEEP!! \$38.00 only a few available

ROUNDS!! All 1" deep

6 1/2" Round \$22.00

8 1/2" Round \$24.00

10 1/2" Round \$26.00

12 1/2" Round \$30.

14 1/2" Round \$38.00

SQUARES!! All 1" deep

5 1/2" BY 5 1/2" Square \$26.00

8 1/2" BY 8 1/2" Square \$28.00

10 1/2" BY 10 1/2" Square \$32.00

12" x 12" Square \$36.00

12 1/2" x 12 1/2" Square \$36.00

14 1/2" BY 14 1/2" Square \$39.00

PATTERN BAR FORMERS!! All 2" deep

8" x 3 1/2" x 2" deep \$32.00

10" x 3 1/2" x 2" deep \$34.00

12" x 3 1/2" x 2" deep \$36.00

PATTERN BAR FORMERS!! All 1" deep

18" x 3 1/2" x 1" deep \$39.00 (on clearance for \$30.00 while they last)

Adjustable Heart Formers 2 1/4" deep

Adjusts from 8-12" \$24.00

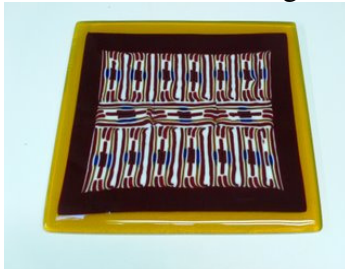

Pattern Bar Formers!!!!

Our Pattern Bar Formers come in 5 lengths. They are great to use as a fill in on that little edge of kiln space that can get wasted. Many times I will have a narrow spot and there is not enough room to make a pattern bar with kiln shelves for dams. This eliminates the lost heat and space of the dams! They are also great for lining up in a row to make production pattern bars. Try combing a pattern bar like the one below!!!

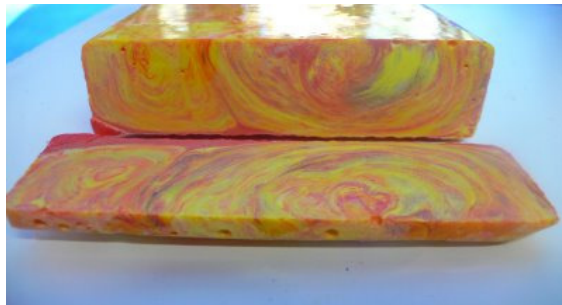

Now I will be making the 8" , 10" and 12" ones 2" deep because so many people are excited about making them with the pot melt method! All you do is line them with your 1/8" fiber and position your pot or 2 over the form and fire to 1685 with a hold of 45 min. Be sure the holes in your pot are inside the center of the stainless steel form and do not overlap the fiber. When you slice these up they can have fabulous patterns that you cannot achieve in a regular pattern bar set up!! See below

These are just like the other stainless steel forms that I make in that you line the walls with 1/8" fiber and put directly on a prepared kiln shelf. Slice up the fused glass from a pattern bar former with a wet saw a viola!!!!!! You can see one use of pattern bars down

the center of this cobalt tray above. In the other one above I have laid up the slices and surrounded them with 3/8 slices on their sides, put into another form with fiber and stainless and full fused. Below is a picture of pot melts into pattern bar formers. These are very exciting and simple to do. Slice them up to see the surprises inside! Here are a couple of shots of ones I have made.....

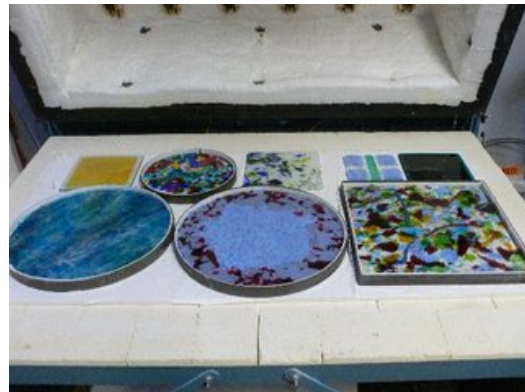

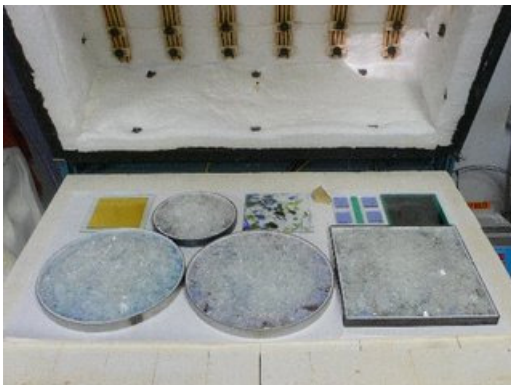

Very exciting possibilities!!!!

Stainless Steel Formers

These rings are perfect for deep glass, strip work, combing, pot melt forms (see picture above), and for using up scrap glass. They are used by putting a lining of 1/8" fiber around the interior of the circle and sitting it right on a kiln washed shelf.

These are exterior sizes. All 1" deep.

Great way to use up scrap glass.....before and after above.....

The top little picture is of an extra trick I have been using.....I cut a very thin strip of 1/8 fiber scrap and put it under the stainless in 3 places then as it is up a little I push the fiber ring to the floor of the kiln. This is great if you ever happen to go to the extreme temp....if your glass ever wants to go under the wall it will only touch fiber. It works great. I fire in these rings every day and have not had them touch glass once since I have been adding this touch!!
